

INFINITE TALENT BRASSRING

Bespoke recruitment
platform with competency
match with BrassRing

The client wanted to provide a seamless experience from the application to the onboarding stage while handling all the hiring steps, processes, and checks in the background. In addition, the client has a dynamic competency framework for each position, and they require a system to understand their structure and translate it to hiring decisions.

Since the candidate would be highly qualified and experienced, they needed a system that could handle a high stack of education, work history, and, most importantly, supporting documents.

We were able to extensively consult with them to understand and build a customized experience with the help of BrassRing and Onboarding platforms. The setup includes integration with over 15 platforms, including their HRIS, third-party verification, and agencies, saving them over 75 days per annum.

BUSINESS Challenge

The client hires experienced professionals with niche skills and they require an Applicant tracking platform that can cater to providing a seamless experience to these professionals

The platform needs to understand their competency framework and use the data while making hiring decisions

Each candidate comes with a heavy record stack, and the platform needs to support

The platform needs to support integration with their partners, verification services, HRIS, and other systems in their HR infrastructure

INFINITE Solution

Implemented custom BrassRing and Onboard platform with an extensive discovery phase

Followed by a design phase to demonstrate the future state ending with implementation and testing

VALUE Delivered

Magnific experience to candidates
'Apply to Hire' ratios significantly improved, as demonstrated by our Metrics Dashboard.

The customer's dynamic competency framework was incorporated into the BrassRing platform, which aids hiring managers in making informed hiring decisions

Integration of all external parties/partners in customer's hiring process with just the right amount of access
